

# Express Drain Setup Instructions

Example set-up of the Express Drain with Ebb & Flood

## Contents:

Siphon cap

Filter cup

## Benefits of the Express Drain:

- Reduces the drain period by up to two thirds
- Vacuum action oxygenates the nutrient solution
- Ensures that small plants are not sat in water for prolonged periods
- Gives growers the opportunity to increase the number of feeds to maximise plant uptake and yields
- Ideal for Ebb & Flood and Vegitator
- For use with all 30mm Drain fittings

1. Place the filter over the threaded end of the taller overflow fitting.

2. Place the fitting into the overflow hole.

3. Secure the fitting from underneath the growing table using the fastening nut.

4. Push the siphon cap into the filter cup and your express drain is now ready to use.
