

## Oxypot 4 / V9 Instructions

Components	Oxypot 4	Oxypot V9
Tank	1	1
Lid	1 (5 Holes)	1 (9 Holes)
Basket	4	9
Cap	1	1
Air Stone	4	4
Air Pump	1	1
1.5m Air line tube	6	6
Blue air line Ts	2	2

### Instructions:

1. Fit 2x air line tubes to the pump outlets
2. Connect the opposite end of each of these air line tubes to the base of each T
3. Connect the 4x air stones to the end of the 4 air line tubes
4. Place air stones in the round locators in the tank
5. Connect the open ends of the air line tubes to the Ts
6. Place the lid on the tank and position the air lines to run through the spaces provided
7. Place the baskets in position
8. To use one hole as an access point, simply cover with the cap provided

### Handy Tip

Reverse your lid, lowering plants further into nutrient solution, whilst roots establish.
